CCE-LTER REU’s Summer 2015

Linda Tong analyzed zooplankton grazing, Ohman lab
Abdalrahman Alrayyes developed a proxy measure of seawater pH, Goericke lab
Vivian Tong researched marine cyanobacteria, Palenik lab
Raul Martinez analyzed trace metals in seawater, Barbeau lab
Maria Winters used Matlab to manipulate biophysical models, Miller lab

Five REU interns worked in various CCE LTER labs at SIO this summer. Besides lots of hard work, bi-weekly lunches were held with mentors for various discussions, as well as lab tours & grad. school advice.

THANKS to ALL the mentors!

Awesome!
